

Health Policy:

Each child in Colorado should have access to medical insurance to ensure that our enrollment application include questions about the child primary health care provider and dental. As part of each child health promotion, we know it is important that a child has a medical primary care provider, because they provide us with all stages of the child's development. Some families don't have any information on where to go to get medical insurance. We at Sunrise Daycare and Preschool provide them with resources like Tri County and The Refugee Clinic at Lowry. At Sunrise we provide the families with the resources of hearing, oral, and vision screening and speech therapy because many children have health conditions, if not treated immediately will cause developmental delay. Our office staff will follow up with the families and provide additional resources.

Injuries and Illnesses:

Accident reports will be written for scrapes, bruises, scratches, bloody nose, etc. Parents will need to sign the form upon leaving for the day, a copy will be made for each parent and a copy will be put in the child's file. In case of an emergency, 911 will be called immediately; parents will be notified and directed to the appropriate location. If a child becomes sick during the day, the teacher will isolate that child to reduce the chance of contamination and spreading the illness. Parents/guardians will be contacted and required to pick up their child within an hour of the call. If the child has a fever above 100.5 degrees the child is required to stay home for 24 hours after the fever is gone. See list of recommendations for keeping your child home.

Safety Procedures:

Sunrise only releases children to the adult whom written authorization is given. In an emergency and the parent cannot pick up their child, verbal authorization is allowed however an email, fax or signed piece of paper is required too.
